Quaid-e-Azam University, Islamabad

## Use Case Diagram:

- **Actors**

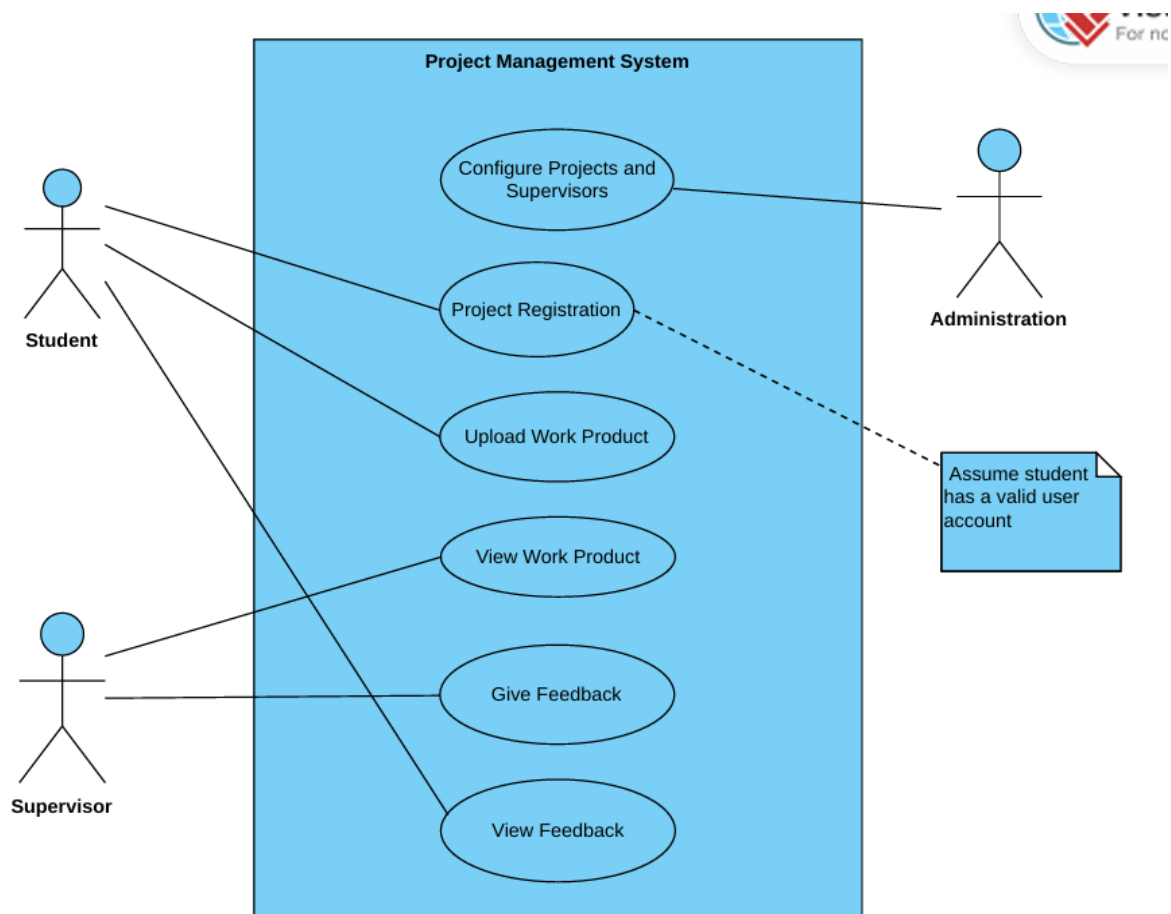

1. Student
2. Supervisor
3. Administration

- **Use-Cases**

1. Configure Projects and Supervisors
2. Project Registration
3. Upload work product
4. View work product
5. Give feedback
6. View feedback

- **Assumption**

1. Assume students have a valid user account

## **Use-Case Diagram Description**

The Project Management System is designed to facilitate communication between students and supervisors throughout the final semester project. The system allows students to register projects, upload work products, and view feedback from supervisors. Supervisors can give feedback and review submitted work products. Additionally, administrators can configure projects and assign supervisors to ensure proper project management.
